

Splashtop Shield for Business

Protect more. Manage less.

Reduce risk and strengthen your security posture with modern AV, AI-assisted detection, and antiscam protection.

The state of business security today

48%

Of all confirmed breaches involved ransomware in 2026, up from 44% the year before¹

9.8%

Share of annual revenue US businesses lost to fraud last year, up 46% YoY²

96%

Of ransomware victims in 2026 were small and midsize businesses¹

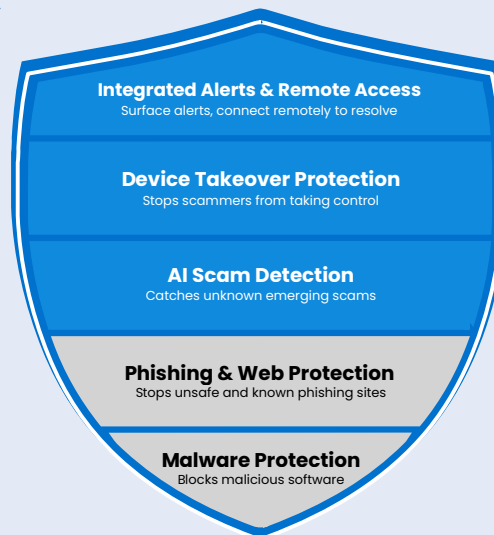

Protection beyond traditional Antivirus

From everyday antivirus to centralized IT response, Shield closes the gaps that leave your business exposed.

Splashtop Shield

All 5 Layers

Splashtop Shield Exclusive
 Standard Protection

Standard AV stops here

A practical fit for growing IT teams

Straightforward deployment

Get protection running in minutes across Windows and macOS endpoints, no dedicated security team required.

Simple, day-to-day administration

Manage protection and policies, with alerts surfaced right alongside the endpoint data your team already checks.

Fits your Splashtop setup

Integrate with Splashtop's remote access platform to connect and investigate without switching tools.

Real scenarios, real response

Situation

An employee clicks a phishing link.

Shield response

Identifies the unsafe site and blocks it before the damage spreads.

Situation

A device shows unauthorized remote-access activity.

Shield response

Detects the attempt and alerts IT immediately.

Situation

Someone installs an unsafe app.

Shield response

Detects the malicious file in real time before it executes.

Situation

An employee receives a convincing scam email or message.

Shield response

Anti-scam detection flags it before it leads to a bigger compromise.

Splashtop Shield for Business

Modern endpoint protection

For Windows and macOS devices.

- Malware and file scanning
- Anti-scam and phishing site blocking
- Unauthorized remote access tools (RATs) or similar software's blocking
- Alerts for your IT team
